International University

Faculty of Applied Science
Medical Analysis Department

Course Descriptions

The research is a strong and vital part of the students learning strategy. Students through research project will be able to work independently and collaboratively to reach the gaps in the science of medical diagnosis. The students will be guided and supervised through top scientists to build up their research skill and data management, to seek the gaps and fill it with knowledge through experimental results. The course is highly supported by the department to build up the student's creativity and critical thinking skills in laboratory techniques and approaches of medical analysis and specimen diagnosis.

MA 410 / RESEARCH PROJECT
